			4.	In the Weisse Stadt Settlement, Fuilding No 49 has again been occupied by air force soldiers since 6 October. Repair work was being
				done on the iron gate near Building No 21. The Ernst Thaelmann Stresse was blocked on 3 October and has been guarded since. About
				25 trucks have been parked in Garage No 35 since the beginning of October.
25X1				In the first half of October, 48 fuel containers were being in-
			``لـــ	stalled at the field. The pits in which the containers lay in groups of twos had concrete wells, about 1 meter thick. Around mid-
				Octoler, canals were being concreted between the individual pits. In these canals connecting tubes were to be laid. North of the fuel
				pits, construction work was under way on a brick fullding, 15 x 25 heters,
				probably a pumping house.
			6.	Construction work was started on a transformer house about 100 meters west of Velten bridge. A ditch, probably for the leying of cables, was
				being excavated and was about ACO meters long from the transformer house to the north. This ditch was to lend as far as the pumping house in
				the fuel dum and as far as the hangar, a surveyor stated. The Rangar
				had been renovated and its annex was teing provided with window panes. The skylight was being newly boarded up.
			7.	The excavating of cable ditches at the field continued up to 15 October. All fuel containers were installed in the fuel dump by that date. No change was observed with regards to the occupation of the field.
25X1			క.	The airfield was still unoccupied up to 15 October. The soil was being plowed in the northwestern corner of the field where several tractors
				were observed. Construction work was being done on a building north of the fuel dump. The main gate was guarded by a civilian, while the bridge was guarded by two VP soldiers.
			9.	In the Weisse Stadt Settlement, the loard fence was being extended from Building No 35 beyond the Ernst Theelmann Strasse. Briquettes were being unloaded on 14 and 15 October.
25X1			no.	In early October, clearing work was being done at the field and the two cement sheds were removed. Work was under way on the fuel dump and on
25X1				the approach roads to this dump. 60 to 70 soldiers wearing red-bordered black epaulets, who trucked crushed stones
				and chippings to the Teisse Stadt Settlement.2
25X1			ii.	During conferences mention was made that one million eastmarks had been allotted for air force barracks installations which were to be built,
				either in the Weisse Stadt of at Oranienburg airfield during the first quarter of 1954. Construction work allegedly would be carried out by the special construction bureau Eberswalde of the Oranienburg construc-
				tion office since the Soviets formerly had not been satisfied by the work of the Eauunion Leipzig.
			12.	No aircraft were stationed at the field on 13 October. A civilian gward was posted at the approach road to the field. Work was still being done
				on the field area. On the northern edge of the field, furniture and
25X1				moved through the entrance gate to the field.2
